---

## Our Reconditioning Process

Each imaging system undergoes a detailed multi-step reconditioning process performed by experienced engineers to ensure dependable operation and imaging performance.

Key steps include:

- Complete system inspection and verification
- Mechanical and electrical component restoration
- Cable and system integrity testing
- OEM-level calibration and system configuration
- Cosmetic refinishing and detailing
- Comprehensive system testing before deployment

---

## Reliable Imaging Performance

Brown's Medical Imaging delivers dependable imaging solutions backed by experienced service professionals.

- ✔ High system reliability and uptime
- ✔ Expert installation and project coordination
- ✔ Experienced imaging engineers and technical support
- ✔ Remote monitoring and diagnostics capabilities
- ✔ Ongoing service and maintenance options

---

## Flexible Acquisition Options

Brown's offers multiple ways to bring advanced imaging technology to your facility.

- Equipment financing and leasing options
- Trade-in opportunities
- Mobile rental options
- Fee-per-scan mobile programs
- Service and upgrade packages
